

TYLER FIRE DEPARTMENT

November 18, 2019

To whom it may concern:

RE: Fitzpatrick Architects

We are pleased to provide this reference letter for Fitzpatrick Architects.

Over the past 2.5 years, Fitzpatrick Architects partnered with City of Tyler Fire Department on the design, construction bid and construction of two relocated fire stations.

We found Fitzpatrick Architects' staff to be very knowledgeable, professional and co-operative throughout the course of both projects. In addition, they have been responsive and thorough in addressing any major or minor issues associated with the design or construction of the two stations.

The construction of two fire stations simultaneously was very complex. Fitzpatrick Architects' thorough approach, responsiveness to issues, and comprehension of the projects as a whole, makes them an excellent project teammate and ideal construction partner.

We look forward to working with them again in the future.

We would recommend Fitzpatrick Architects to you without hesitation.

Sincerely,

David L. Coble
