Fitzpatrick Architects
5201 S. Broadway, Suite 200
Tyler, TX 75711

I am writing this letter of reference to inform you of my experiences and observations when working with Fitzpatrick Architects.

The Tyler City Council approved developing a new police sub-station in 2014. Fitzpatrick Architects was selected to complete the design and facilitate the construction of the new facility. I had the privilege of overseeing the initial proposal and being the police department liaison for the project. I maintained this role during the entire process. Throughout the continuous construction process, Fitzpatrick Architects and Brian Phillips, project architect, were extremely helpful in providing guidance and making recommendations. Brian Phillips participated in every construction meeting and provided explanations throughout the process.

The Faulkner Police Station officially opened in January 2016. In addition to being a beautifully designed facility, it is extremely practical for the security and public needs of the department. The functional design of the building allows us to maintain security of operational areas but also provide a public forum for training and meetings.

I am happy to recommend the services of Fitzpatrick Architects and I look forward to seeing the amazing things they will accomplish in the future. Please feel free to contact me if you have any questions or would like to arrange a tour of the Faulkner Police Station.

Sincerely,

Chief Jimmy Toler
Tyler Police Department
